

Treat post-traumatic disorder through art

Press Release 3

We are delighted to announce updates regarding our Erasmus Plus KA2 Project Online colour therapy: Treat post-traumatic disorder through art. The learning/teaching/training activity took place in Barcelona on the 18th-22nd of July, 2022. This training was intended for VET health professionals. The modules created for the curriculum and virtual reality scenarios were presented by partners. Throughout this training, materials produced were tested and feedback was received from VET health professionals.

The future plans were also discussed during the training. As the next goals, we will continue to create the new output, arrange the second training in Cyprus, and plan online color therapy camps to disseminate our project to a larger audience.

The project is progressing efficiently with the collaboration of all partners. Please keep in touch with us for future updates!
